

Pay your child care fees through HiMama!

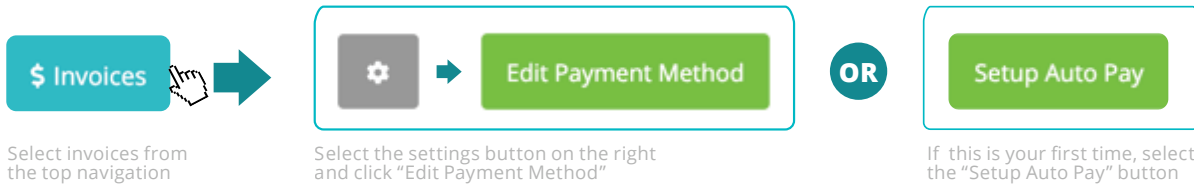

How Does it work?

Our center will generate invoices for your children which will come through your HiMama app or web browser at himama.com. Once the invoice is due, our center will automatically withdraw funds from your bank account or credit card.

How do I set it up?

Easy! Log in to HiMama on your mobile app or web browser.

Now you can enter your banking information or credit card information. This is where our center will withdraw the funds from.

Can I have multiple banking information for multiple children?

Absolutely! You can have your credit card linked to one child and your partners debit banking information linked to your other child. You can switch it up every month if need be!

What type of credit cards does HiMama accept?

Check with your center to make sure your payment type is accepted but generally:

Can I make a partial payment on one card and pay the rest on another card?

Unfortunately not, the invoice must be paid in full using one method of payment (credit card or bank transfer).

Can I overpay an invoice to have a credit available for my next invoice?

Not yet but stay tuned for more information on this feature!

Where can I see a record of my invoices and their statuses?

From your parent Invoices Portal () click into each child's profile to see more information!
